

Assignment:

Name: Kapil Shelke

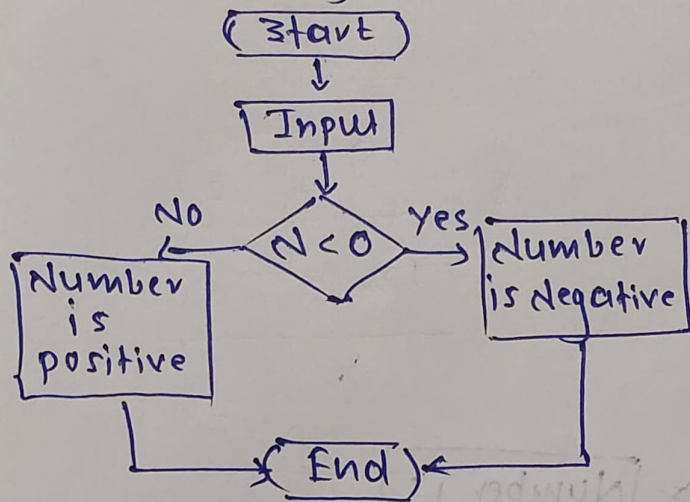

1) Check positive numbers:

program:

```
class CheckPositive {  
    public static void main (String args[]) {  
        if (N > 0) {  
            System.out.println("Number is Positive");  
        }  
        else {  
            System.out.println("Number is Negative");  
        }  
    }  
}
```

2) Check Negative Number:

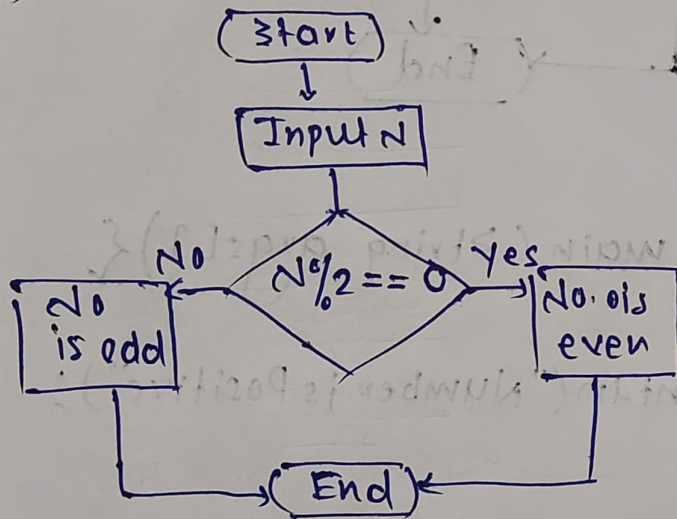

Program:

```

class checkNegative {
    public static void main(String args[]) {
        if (N < 0) {
            System.out.println("Number is Negative");
        } else {
            System.out.println("Number is positive");
        }
    }
}
  
```

3) Check odd or even number:

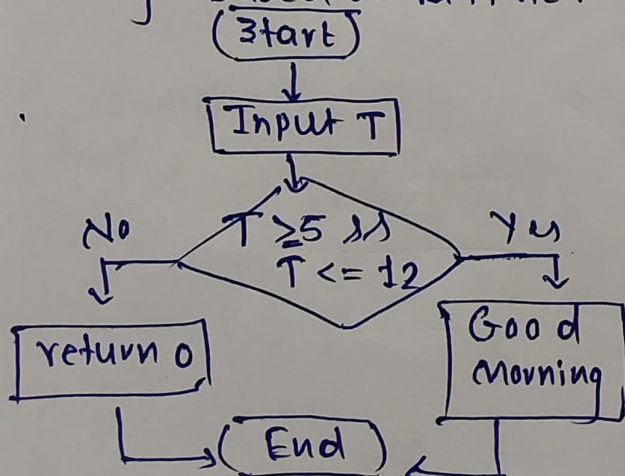

Program:

```

class checkEvenOdd {
    public static void main(String args[]) {
        if (N % 2 == 0) {
            System.out.println("Number is even");
        } else {
            System.out.println("Number is odd");
        }
    }
}
  
```

4) Display good morning time message based on time:

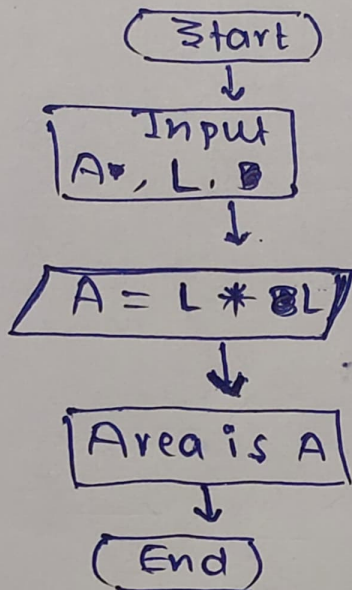

Program:

```

class DisplayMessage {
    public static void main(String args[]) {
        if (T >= 5 && T <= 12) {
            System.out.println("Good Morning");
        }
    }
}
  
```

5) Print area of square:

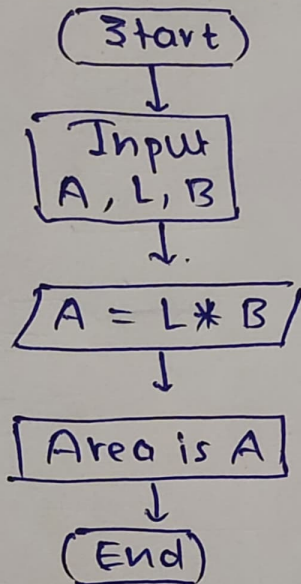

program:

```

class Area {
    public static void main(String
        args[]) {
        Scanner sc = new Scanner(
            System.in);

        int A;
        int L, B;
        A = L * B;
        System.out.println("A");
    }
}
  
```

6) Print area of rectangle:

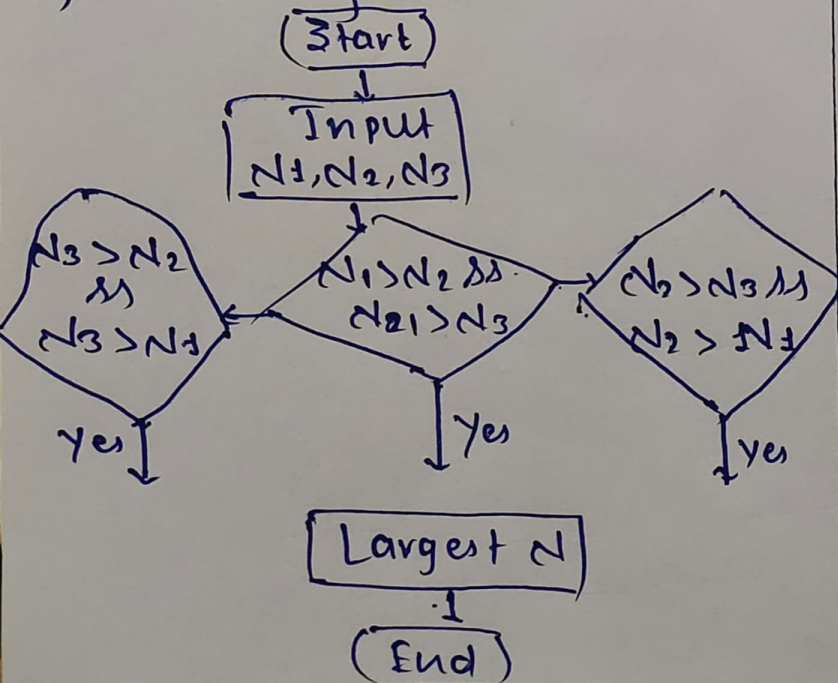

Program:

```

class Area {
    public static void main (
        String args[]) {
        int A;
        int L, B;
        A = L * B;
        System.out.println(A);
    }
}
  
```

7) Find Largest of three no:

program:

```

class Largest {
    public static void main (
        String args[]) {
        int N1;
        int N2, N3;
        if (N1 > N2 && N1 > N3) {
            System.out.println(N1);
        }
        else if (N2 > N1 && N2 > N3) {
            System.out.println(N2);
        }
        else {
            System.out.println(N3);
        }
    }
}
  
```
